

PARTICIPANT HANDBOOK

Event Date	17 - 23 July
Format	Virtual
Registrations	29 June - 16 July
Website	https://luma.com/clickh-uko4
Contact	triggerclickhousehackathon-support@clickhouse.com
Total Prize Pool	EUR 10,000 worth of prizes

A Note from ClickHouse & Trigger.dev

The ClickHouse and Trigger.dev Virtual Summer Hackathon 2026 is ClickHouse's & Trigger.dev's first ever virtual hackathon and we're thrilled to make it happen. Open to developers across EMEA and NAMER, this event is built for engineers, data practitioners, and builders who want to do something real with real-time analytics.

Problem Statement

A few AI chat agents that change how people interact with information. Trigger.dev handles orchestration and background jobs; ClickHouse powers the real-time data layer. Meaningful use of both is required, and it's worth 25% of your score.

Theme: Beyond the Wall of Text

Every chat agent gives you the same thing: a wall of text. Ask about your data and you get paragraphs, bullet points, maybe a markdown table if you're lucky. It's a terrible way to understand anything. But chat doesn't have to be text. A response can be a chart, a map, a diagram, an interactive component you can explore.

Build a chat agent powered by Trigger.dev + ClickHouse where the response itself is the product: visual, interactive, explorable. If your agent's best answer is a paragraph, you've missed the brief.

1. Should I cycle tomorrow? — weather + air quality fused into an hour-by-hour visual of your commute window with a single verdict, not a forecast dump..
2. Ask my logs anything — point it at your app's logs and metrics, ask "why was Tuesday slow?", get back rendered flame graphs, error-rate heatmaps, and a highlighted trace of the actual culprit — not 200 lines of grep output. .

Judging lens: ratio of insight to words. Text is the garnish, not the meal.

things worth knowing before you dive in:

- The problem statement will be shared with all registered participants via email on 17 July at 09:00 CET. Use the time before then to get familiar with ClickHouse and Trigger.dev, not to pre-build.
- The code freeze is enforced automatically. Once the submission portal closes, no further changes can be made. Plan your final hour accordingly.
- You retain full IP ownership of everything you build, but by submitting you agree to publish your source code to a public GitHub repository under the MIT License, the Apache License 2.0, or another permissive open-source license pre-approved by ClickHouse, no later than the submission deadline. You also grant ClickHouse the right to review, evaluate, and feature your submission for hackathon-related and promotional purposes. See the ClickHouse and Trigger.dev Hackathon Terms and Conditions for full details.
- AI coding assistants such as Copilot, Cursor, Claude, and ChatGPT are explicitly permitted and encouraged. Use every tool at your disposal.

We're rooting for you. Build something extraordinary.

1. How to Use This Handbook

This handbook is your complete reference for the ClickHouse and Trigger.dev Virtual Summer Hackathon 2026. It is publicly available whether you are a registered participant, a prospective applicant, or simply curious about the event.

If you are registered, read it in full before submitting your project. Everything you need to prepare, compete, and submit is here: rules, judging criteria, the event schedule, submission requirements, logistics, and support contacts.

2. Event Format

2.1 Theme

The ClickHouse & Trigger.dev Virtual Summer Hackathon 2026 is built around a single theme: **AI Agent Chat Build** — create a sophisticated, production-quality AI agent chat experience using both tools. There are no separate tracks; all teams build within this theme.

2.2 What Happens

The problem statement is revealed at 09:00 am CET on July 17 via email to all accepted teams. From that moment, teams have 7 days to build and submit a working solution. The submission portal closes automatically at midnight Anywhere on Earth (AoE), July 23. There are no extensions.

A jury of 15+ judges will score all submissions. Winning categories are the Grand Prize, Runner-up, and a bonus category for the best OLTP + OLAP integration. A social raffle open to all registered participants will also be drawn at the closing ceremony.

Both ClickHouse and Trigger.dev must be meaningfully used in your solution. Submissions that do not demonstrably incorporate both tools will be disqualified. Free cloud credits for both platforms will be provided to all accepted teams — set these up before July 17, as provisioning can take up to 48 hours.

Required submission components

- A working project hosted in a public GitHub repository under an MIT License, Apache License 2.0, or another permissive open-source license pre-approved by ClickHouse — or hosted on cloud infrastructure
- A demo video (YouTube or Loom, max 5 minutes). Skip the intro — open directly with a screen recording of your working product. Show real usage, live queries, and results, then explain how it addresses the problem statement.
- Project name, description, and names + email addresses of all team members
- A brief description of how ClickHouse and Trigger.dev are each used in the solution

NOTE	You do not need prior ClickHouse experience to participate. Workshops, starter repositories, sample datasets, and sandbox access are provided to all registered teams before the event.
------	---

2.4 Team Structure

Rule	Detail
Team Size	1–5 members
Team Captain	Primary contact; registers on behalf of all the team members and the only person who can make the final submission
Team Name	Set at registration; cannot be changed later
Merging / Splitting of Teams	Not permitted after the hackathon begins

Member of multiple teams	A participant may only be a member of one team
--------------------------	--

3. Hackathon Schedule

3.1 ClickHouse & Trigger.dev Virtual Summer Hackathon

IMPORTANT - The 12:00 am CET code freeze is enforced server-side. The submission portal closes automatically. No extension will be granted.

Date	Milestone
29 June 2026	Registrations open - https://luma.com/clickh-uko4
17 July 2026	Problem statement is released via e-mail at 09:00 am CET
23 July 2026	Submission portal closes at midnight Anywhere on Earth (AoE), July 23
29 July 2026	Winners are announced

4. Rules and Eligibility

4.1 Eligibility

The ClickHouse and Trigger.dev Virtual Summer Hackathon 2026 is open exclusively to professional developers.

Every team member must meet all of the following criteria at the time of registration:

- Be a resident of the United States, Canada, UK, or an EU country, and be 18 years of age or older.
- Not be an employee or official of a government entity, and not be an employee, contractor, consultant, officer, director, or agent of ClickHouse or Trigger.dev, their affiliates, any hackathon-related service providers including event administrators and advertising and promotion agencies, or prize suppliers.
- Be otherwise eligible to participate under the **ClickHouse and Trigger.dev Hackathon Terms and Conditions**.

WARNING	Misrepresentation of eligibility status will result in immediate disqualification, forfeiture of prizes, and removal from the event. All participants are subject to verification by ClickHouse or their partners at any point before or during the event. Registration does not guarantee participation. ClickHouse reserves the right to approve or decline participation applications.
---------	---

4.2 Participation Rules

- Each participant may only be a member of one team.
- Teams must have between 1 and 5 members. Participants are responsible for forming their own team before applying.
- Solutions must use ClickHouse as the primary database. Postgres managed by ClickHouse optional addition. Solutions must also use the Trigger.dev chat.agent(). Superficial or non-functional inclusion of any required technology will not be considered.
- All code submitted must be written during the 7-day hackathon window, which runs from 09:00 CET on 17 July 2026 to midnight Anywhere on Earth (AoE), July 23. Significant portions of the submitted solution must be developed within this window. Pre-existing open-source libraries, public APIs, publicly available datasets, and AI coding assistants such as GitHub Copilot, Claude, and Cursor are permitted, provided they are used in full compliance with their applicable licenses.
- Proprietary code, internal company code, or any code the team does not have the legal right to submit is strictly prohibited. Teams may not share code, architecture, or significant technical approaches with other competing teams during the hackathon window.
- All submitted code must be accessible in a public GitHub repository at the time of submission and

must remain accessible throughout the judging period.

4.3 Intellectual Property

Participants retain intellectual property ownership of the solutions they build during ClickHouse & Trigger.dev Virtual Summer Hackathon 2026, but they agree to grant certain rights in and to their submissions as described in the **ClickHouse and Trigger.dev Hackathon Terms and Conditions**. By submitting a project, you give ClickHouse permission to review, test, display, and use your submission in connection with the hackathon, and to feature it for promotional purposes, in any current or future media formats. For example, we may share it with judges, showcase it in demos or in a presentation, and create promotional materials referencing your project. Participants must publish their submission's source code to a public GitHub repository under either the MIT License or the Apache License 2.0 (or another permissive open-source license pre-approved in writing by ClickHouse) by no later than the submission deadline, 00:00 Anywhere on Earth (AoE), July 23.

4.4 Disqualification

A team may be disqualified for any of the following reasons:

- Misrepresentation of eligibility or identity
- Submitting code written before the hackathon window
- Submitting code that the team does not have legal rights to use
- Plagiarism or substantial copying from another team's submission
- Violation of the code of conduct
- Tampering with the submission portal or any other platform systems
- Failure to submit before the code freeze deadline

5. Submission Process

5.1 How to Submit

Submissions are made via a dedicated submission portal, separate from the registration portal. The link will be shared with all participants on the 17th July 2026. Only the Team Captain is authorised to make the final submission. Ensure your team has confirmed who the Team Captain is before event day.

Your submission must address the problem statement your team selected at the start of the hackathon. Submissions that do not correspond to the registered problem statement will not be evaluated.

5.2 Submission Requirements

Field	Format / Limit
Project Title	Plain text, max 100 characters
Project Tagline	Plain text, max 160 characters
Solution Summary	Plain text, max 500 words
GitHub URL	Public repository, accessible URL
Demo video URL	YouTube or Loom, max 5 minutes

NOTE	Your GitHub repository must be public at the time of submission and remain public through the judging period.
------	---

5.3 Submission Window

Milestone	Date / Time
Submission portal opens	09:00 am CET, Thursday 17 July 2026
Code freeze (portal closes)	00:00 Anywhere on Earth (AoE), 23 July 2026

6. Judging and Evaluation

6.1 Judging Process

Submissions are evaluated by a panel of 15+ judges: a combination of ClickHouse & Trigger.dev's engineering leaders and senior industry practitioners & guest judges. Judges review all final submissions independently using the structured rubric below. Scores are weighted and aggregated by the platform to produce a leaderboard.

6.2 Submission Requirements

Criteria	Weightage	What Judges Evaluate
Use of ClickHouse & Trigger.dev	25%	Depth, creativity, and correctness in leveraging ClickHouse and Trigger.dev
Problem Fit	20%	How well the solution addresses the problem statement. Does it solve the right problem?
Technical Implementation	20%	Code quality, architecture, system design, and engineering soundness. Would this work in production?
Innovation	20%	Novelty of approach and originality. Is this something genuinely new?
Scalability & Impact	10%	Real-world applicability and potential to scale. Could this be deployed by real users?
Presentation	5%	Clarity and quality of the demo video.

Scores are on a scale of 1–10 per criteria, weighted by the percentages above. Judges score independently and no judge can see another judge's scores until the panel is locked. The weighted aggregate score determines the leaderboard ranking.

6.3 Judging Decisions

NOTE	All judging decisions are final. The aggregate score and final rankings are not subject to appeal. ClickHouse, Trigger.dev and their execution partner reserve the right to withhold prizes if the quality of submissions does not meet the event's
------	---

standards.

7. Prizes and Recognition

7.1 Prize Structure

Position	Prizes (worth of)	Additional Recognition
Winner	EUR 6.000,00	Ultimate desk setup bundle (iMac - Ipad Air - Airpod Max - Apple Watch accessories) + \$2K ClickHouse Credits + \$2K Trigger.dev credits
Runner Up	EUR 2.000,00	Dev bundle (Macbook air - Ipods pro - accessories) + \$1K ClickHouse Credits + \$1K Trigger.dev credits
Bonus category — best OLTP + OLAP integration	EUR 1.000,00	Premium Lego set (Option 1: Titanic Option 2: Lord of the Rings Option 3: Star Trek) + \$500 ClickHouse Credits + \$500 Trigger.dev credits
Social Raffle	EUR 1.000,00	Swag box — open to all registered participants (Personalized ClickHouse + Trigger.dev branding)

Total prize pool: EUR 10.000,00

7.2 Prize Disbursement

All prizes are awarded in kind as physical prizes. No cash transfer is involved. Prize values represent approximate fair market value and fulfillment may be subject to applicable tax withholding and reporting requirements.

Prizes will be shipped to a confirmed address within 30 days of the event. The Team Captain is responsible for distributing prizes among team members.

Prize fulfilment is subject to completion of disqualification checks. ClickHouse and Trigger.dev reserve the right to withhold prizes if eligibility or conduct violations are identified after the event.

8. Technical Resources

8.1 Getting Started with ClickHouse & Trigger.dev

You do not need prior ClickHouse experience to participate. Resources to help you get up to speed will be shared starting July 2026 via email sent to the captain's e-mail address. These will cover core concepts, hands-on examples, and everything you need to hit the ground running on event day.

ClickHouse Cloud & Trigger.dev account setup: Only **one team member** needs to create a ClickHouse Cloud & Trigger.dev account and redeem the team's credits. All remaining team members are then added to that organisation, no separate accounts are needed. Documentation and resources showing how to invite members to your ClickHouse Cloud & Trigger.dev organisation will be shared with all accepted teams ahead of the event.

8.2 Permitted Tools

You may use any tools, frameworks, libraries, or services that are lawfully accessible. The following are explicitly permitted:

- All open-source libraries and frameworks
- Public cloud services (AWS, GCP, Azure, Cloudflare, etc.)
- AI coding assistants (GitHub Copilot, Cursor, Claude, ChatGPT, etc.)
- Public APIs and datasets
- ClickHouse Cloud (free tier or paid - your own account or the provided sandbox)

8.3 Platform Credits

All accepted teams will receive free cloud credits to cover their usage during the hackathon build window. Each team receives \$400 in ClickHouse Cloud credits and \$5 in Trigger.dev credits. Please use your credits mindfully and plan your resource usage in advance to avoid running out during the build window.

If your team runs out of credits, send an email to triggerclickhousehackathon-support@clickhouse.com to request additional credits. A one-time top-up equal will be provided upon request. This top-up is available once per team and is not guaranteed beyond the initial request.

IMPORTANT - Prior trial users: If your team has previously used a ClickHouse Cloud trial or a Trigger.dev trial, you must use a different email address (not the one used during your trial) to claim your hackathon credits. Credits cannot be applied to accounts that have previously used a free trial on either platform.

9. Code of Conduct

ClickHouse & Trigger.dev Virtual Summer Hackathon 2026 is committed to providing a respectful, inclusive, and professional environment for all participants, mentors, judges, volunteers, and organisers. All attendees are required to abide by this code of conduct from check-in to departure.

9.1 Prohibited Behaviour

The following are strictly prohibited: harassment, discrimination, or offensive conduct of any kind, whether verbal, written, or physical; cheating, plagiarism, or any form of dishonest conduct; and accessing or attempting to access systems, networks, or data you are not authorised to access.

9.2 Reporting

If you experience or witness behaviour that violates this code of conduct, report it immediately to triggerclickhousehackathon-support@clickhouse.com. All reports are handled confidentially.

WARNING	Violations may result in immediate removal from the event, disqualification of the team, and forfeiture of any prizes.
---------	--

10. ClickHouse and Trigger.dev Virtual Summer Hackathon Terms and Conditions

These Terms ("Terms") govern your registration for and participation in the ClickHouse x Trigger.dev AI Hackathon ("Event"), co-hosted by ClickHouse, Inc. and Trigger.dev ("we", "us", "our"). By registering, you agree to these Terms. If you do not agree, do not register.

10.1 Eligibility

You must be at least 18 years of age to participate. The Event is open to individual developers and teams of up to five (5) people. Participation is limited to certain regions; some regions are excluded for legal and compliance reasons. ClickHouse and Trigger.dev employees, contractors, and their immediate family members are not eligible to win prizes. Registration is subject to application review and acceptance at our sole discretion. Accepted registrations may not be shared or transferred.

10.2 Registration & Applications

To participate, you must complete the application form and be accepted. We reserve the right to accept or reject any application for any reason. Accepted teams will be notified by email. Registration closes July 16, 2026. Teams must register together — partial team registrations are not accepted after the deadline.

10.3 Required Stack

All submissions must meaningfully incorporate both ClickHouse and Trigger.dev as core parts of the project. Submissions that do not demonstrably use both tools will be disqualified. Free cloud credits will be provided to accepted teams for this purpose.

10.4 Submissions

Submissions must be received via the official Google Form by midnight Anywhere on Earth (AoE), July 23, 2026. Late submissions will not be accepted. Each submission must include: a project name and description; names and email addresses of all team members; a link to a public GitHub repository; a video demo of 3–5 minutes in length (opening with a live demonstration, followed by a technical walkthrough); and a description of how ClickHouse and Trigger.dev are used. Hosting the project live is optional. By submitting, you confirm that the project is your original work, created during the hackathon build window (July 17–23, 2026).

10.5 Intellectual Property

You retain ownership of your submission. By entering, you grant ClickHouse and Trigger.dev a non-exclusive, royalty-free, worldwide license to use, display, reproduce, and promote your submission and any related materials (including video demos, descriptions, and screenshots) for marketing, promotional, and community purposes, with attribution. You represent and warrant that your submission does not infringe any third-party intellectual property rights.

10.6 Prizes

Prizes will be awarded at our sole discretion based on judging criteria published on the Event website. Prize values are to be determined and will be published prior to the Event opening. Prizes are co-funded by ClickHouse and Trigger.dev. Where a cash prize is offered, an item of equivalent value may be substituted depending on the recipient region. Prize recipients may be required to complete tax documentation (including W-9 or equivalent) before prizes are disbursed. Prizes are non-transferable. By accepting a prize, you confirm you are permitted to do so under applicable laws and your organization's policies.

10.7 Judging

Submissions will be evaluated by a panel of judges selected by ClickHouse and Trigger.dev. Judging decisions are final. Judging criteria will be published on the Event website prior to the build window opening. We reserve the right to withhold any prize if, in our judgment, an insufficient number of qualifying submissions are received.

10.8 Acceptable Conduct

ClickHouse and Trigger.dev are committed to providing a harassment-free and inclusive experience for all participants, regardless of gender identity, sexual orientation, disability, ethnicity, nationality, race, age, religion, or other protected characteristics. We do not tolerate harassment in any form. By participating, you agree to adhere to the ClickHouse Code of Conduct. We reserve the right to disqualify any participant or team whose conduct we deem inappropriate, at any time and for any reason.

10.9 Your Information

Our [privacy policy](#) explains how we handle personal information submitted during registration and Event participation. By registering, you agree that ClickHouse and Trigger.dev may contact you regarding your registration, the Event, and related products and community resources. You may unsubscribe at any time. Registration information may be shared between ClickHouse and Trigger.dev as co-hosts of the Event.

10.10 Recordings & Materials

The Event may be recorded. By registering, you agree that ClickHouse and Trigger.dev may use recordings, images, and any materials you submit or present in connection with the Event for any purpose and in any medium, without compensation. Unauthorized recording or redistribution of Event content is

prohibited.

10.11 Cancellation

We may cancel or modify the Event at any time. We are not responsible for any damages arising from such cancellation or modification. Registration fees, if any, are non-refundable unless otherwise stated. Sections 5, 9, 10, 12, and 13 survive any cancellation.

10.12 Limitation of Liability

To the maximum extent permitted by law, ClickHouse and Trigger.dev will not be liable for any indirect, incidental, special, consequential, or exemplary damages arising from your participation in the Event. Our aggregate liability under these Terms will not exceed USD \$100.

10.13 Miscellaneous

These Terms are governed by the laws of the State of Delaware, without regard to conflict of law principles. Disputes will be resolved exclusively in the federal or state courts of Delaware, USA. We may modify these Terms at any time by posting a revised version on the Event website. Your continued participation after any modification constitutes acceptance of the revised Terms. These Terms constitute the entire agreement between you and us regarding the Event.
